

# SCIENTIFIC PROGRAMME

Thursday, 9th July 2026 (Day-1)

| Session / Time                    | Topic  | Speaker            |
|-----------------------------------|--|--------------------|
| 07:00 onwards                     | <b>Registration</b>  |                    |
| 07:55                             | <b>Opening Remarks and Welcome</b>   |                    |
| <b>Session 1</b><br>08:00 - 10:00 | <b>Symposium A</b><br><b>Embracing Modern Technology in Uveitis Management</b>                         |                    |
| <b>Moderators</b>                 | Hiroshi Keino, Michal Kramer   |                    |
| 08:00 - 08:10                     | From Symptoms to SNPs: When to Consider Genetic Testing in Uveitis                                     | Claudia Fabiani    |
| 08:10 - 08:20                     | Infection and Immunity: A Delicate Dance with Clinical Consequences                                    | Gerhild Wildner    |
| 08:20 - 08:30                     | Inflammasomes in the pathogenesis of Uveitis   | Shengping Hou      |
| 08:30 - 08:40                     | NGS and Omics: Hype or Hope in Clinical Decision Making?   | Thuy Doan          |
| 08:40 - 08:50                     | Tracing the cause of Birdshot Uveitis with Multi-Omics   | Jonas Kuiper       |
| 08:50 - 09:00                     | Gut Feelings: Exploring Diet, Microbiome, and Uveitis  | Ines Leal          |
| 09:00 - 09:10                     | The Effect of Pollution on Uveitis   | Peizeng Yang       |
| 09:10 - 09:20                     | Autoantigens in Uveitis and their implications   | Lucia Kuffova      |
| 09:20 - 09:30                     | Aqueous humor Analysis for biologic therapy selection  | Ahmed Abu El-Asrar |
| <b>09:30 - 10:00</b>              | <b>Panel Discussion</b><br><b>Immunology, Omics and Uveitis: Way to Precision Medicine?</b>            |                    |
| <b>Moderator</b>                  | Lucia Sobrin   |                    |
| <b>Panelists</b>                  | Joke De Boer, Lyndell L. Lim, Jolanda D.F. de Groot-Mijnes, Shengping Hou, Jonas Kuiper, Soumyava Basu |                    |

|                      |  |
|----------------------|--|
| <b>10:00 - 10:15</b> | <b>Mini symposium</b><br><br>KSI-101, a Bispecific Intravitreal Biologic Targeting IL-6 and VEGF for the Treatment of Macular Edema Secondary to Inflammation (MESI): Phase 1b Results and Ongoing Phase 3 Studies<br><br>Edmund Tsui, MD<br>Yih-Shiou Hwang, MD |
|----------------------|--|

|                      |                                    |
|----------------------|------------------------------------|
| <b>10:15 - 10:45</b> | <b>Refreshment Break + Posters</b> |
|----------------------|------------------------------------|

|                                    |  |                                    |
|------------------------------------|--|------------------------------------|
| <b>Session 2<br/>10:45 - 12:25</b> | <b>IUSG Plenary Session 1</b><br><b>Vasculitis, Leakage and Vasculopathy: Spot the Difference</b>              |                                    |
| <b>Moderators</b>                  | James T Rosenbaum, Vishali Gupta   |                                    |
| 10:45 - 10:55                      | Systematic Review of Retinal Vasculitis: The Lacunae and heterogeneity   | Carlos Humberto Cifuentes González |
| 10:55 - 11:05                      | Unmasking Retinal Vasculitis: What is not right?   | Janet L. Davis                     |
| 11:05 - 11:15                      | Systemic Vasculitis & the Eye: A Dangerous Liaison   | Jörg Henes                         |
| 11:15 - 11:25                      | Line in the Sand: Is Retinal Vasculitis an independent diagnosis or part of Intermediate and Posterior Uveitis | Douglas A. Jabs                    |
| 11:25 - 11:35                      | High Resolution OCT insights into Retinal Vasculitis   | Alessandro Invernizzi              |
| 11:35 - 11:45                      | ReVise: Defining Retinal Vasculitis, leakage and vasculopathies  | James T. Rosenbaum                 |
| 11:45 - 11:55                      | Quantification of Retinal Vasculitis: The Way Forward  | Maria Vittoria Cicinelli           |

|                      |   |  |
|----------------------|---|--|
| <b>11:55 - 12:25</b> | <b>Panel Discussion</b><br><b>Retinal Vasculitis: Lacunae and Challenges</b>                                  |  |
| <b>Moderator</b>     | Ilknur Tugal-Tutkun   |  |
| <b>Panelists</b>     | Moncef Khairallah, Jennifer E. Thorne, Elisabetta Miserocchi, Peter McCluskey, Jyotirmay Biswas, Marc de Smet |  |

|                      |                    |
|----------------------|--------------------|
| <b>12:25 - 13:10</b> | <b>Symposium</b>   |
| <b>13:10 – 14:00</b> | <b>Lunch Break</b> |

|   |  |                    |
|---|--|--------------------|
| <b>Session 3<br/>14:00 – 16:00</b>                  | <b>What's New? IUSG Free Papers Session<br/>(6 min presentation + 2 min discussion)</b>  |                    |
| <b>Moderators:</b> Deshka Doycheva, Masaru Takeuchi |  |                    |
| 14:00 - 14:08                                       | Uveitis activity and visual acuity after the first year – A TOFU registry report   | Carsten Heinz      |
| 14:08 - 14:16                                       | Pentraxin 3 is a Novel Inflammatory Marker of HLA-B27-associated Uveitis   | Ahmed Abu El-Asrar |
| 14:16 - 14:24                                       | Post-Surgical Uveitis Risk: Insights from a Case-Control Study   | Ahmed Sallam       |
| 14:24 - 14:32                                       | Acute Posterior Multifocal Placoid Pigment Epitheliopathy Spectrum on Multimodal Imaging: A Severity-Driven Ischemic Continuum       | Luca De Simone     |
| 14.32 - 14.40                                       | Evaluation of factors affecting long-term visual outcome in uveitis using categorical data analysis program                          | Nobuyoshi Kitaichi |
| 14.40 - 14.48                                       | Automated segmentation of serous retinal detachments in Vogt-Koyanagi-Harada disease   | Ines Leal          |
| 14.48 - 14.56                                       | Tumor Necrosis Factor Inhibitor Therapy Versus Conventional Immunosuppression for Noninfectious Uveitis: Cataract Incidence          | Ninani Kombo       |
| 14.56 - 15:04                                       | Gut microbial N-acetylmethionine disrupts Th1/Th17-Treg balance via m6A-dependent NR4A2 degradation in paediatric idiopathic uveitis | Peizeng Yang       |
| 15.04 - 15:12                                       | Adalimumab Biosimilars Compared to Originator: Impact on Uveitic Macular Edema   | Yael Sharon        |
| 15.12 - 15.20                                       | Advancement in Uveitic Glaucoma: Knowledge, Practice and Outlook   | Meghan Berkenstock |
| 15.20 - 15.28                                       | Capsaicin aggravates uveitis by altering gut microbiota and tryptophan metabolism  | Xiaoli Liu         |

|               |  |                    |
|---------------|--|--------------------|
| 15.28 - 15.36 | Widefield Optical Coherence Tomography Angiography Assessment of Anterior and Posterior Segment Vascular Changes in Takayasu Arteritis | Sibel Kadayifcilar |
| 15.36 - 15.44 | Transcriptomic Profiling of peripheral blood lymphocytes in Vogt-Koyanagi-Harada and Behcets disease                                   | Jyotirmay Biswas   |
| 15.44 - 15.52 | Efficacy and safety of Vamikibart in patients with Uveitic Macular edema: First report of pooled Phase 3 MEERKAT and SANDCAT Trials    | Lyndell Lim        |
| 15.52 - 16:00 | In Silico Analysis of Autoimmune responses related to Chorioretinal Atrophy  | Marion Munk        |

|                      |                                    |
|----------------------|------------------------------------|
| <b>16:00 – 16:30</b> | <b>Refreshment Break + Posters</b> |
|----------------------|------------------------------------|

|                                    |   |                       |
|------------------------------------|---|-----------------------|
| <b>Session 4<br/>16:30 – 18:15</b> | <b>Symposium B<br/>Embracing Modern Therapeutics in Non-Infectious Uveitis Management</b> |                       |
| <b>Moderators</b>                  | Luca Cimino, Bahram Bodaghi   |                       |
| 16:30 - 16:40                      | Outcomes of Non-Infectious Uveitis in patients from Uveitis registries                    | Robert P. Finger      |
| 16:40 - 16:50                      | Choosing Wisely for Macular edema in Uveitis  | Antoine Brézin        |
| 16:50 – 17:00                      | Suprachoroidal vs. Intravitreal Delivery—What Wins?                                       | Steven Yeh            |
| 17:00 – 17:10                      | Drug induced Uveitis: Not to miss   | Dara Kilmartin        |
| 17:10 – 17:20                      | Vitamin D as supplement in Non-infectious Uveitis   | Alejandra de-la-Torre |
| 17:20 - 17:30                      | Targeting Inflammasomes and Pyroptosis: Future perspectives                               | Wei-Chi               |
| 17.30 - 17.40                      | Caught between Fire and Pressure: Managing Uveitis and Glaucoma                           | Marc D de Smet        |

|                      |  |
|----------------------|--|
| <b>17:40 – 18:00</b> | <b>Panel Discussion<br/>Incorporating newer therapeutics in practice</b> |
|----------------------|--|

|                  |  |
|------------------|--|
| <b>Moderator</b> | Jennifer E. Thorne   |
| <b>Panelists</b> | Uwe Pleyer, Stephan Thureau, Nicole Stübiger, Soon Phaik Chee, Oren Tomkins-Netzer, Carlos Pavesio |

|              |   |
|--------------|---|
| <b>18:00</b> | <b>Welcome Reception</b><br><b>Venue: Museum, Wilhelmstraße 3, 72074 Tübingen</b> |
|--------------|---|

# SCIENTIFIC PROGRAMME

Friday, 10th July 2026 (Day-2)

| Session / Time                     | Topic  | Speaker               |
|------------------------------------|--|-----------------------|
| <b>Session 5<br/>08:00 – 09:50</b> | <b>Symposium C<br/>Not the Usual Stuff – Uveitis Curveballs to Watch Out For</b> |                       |
| <b>Moderators</b>                  | Massimo Accorinti, Radgonde Amer   |                       |
| 08:00 - 08:10                      | Immune Check! When Cancer Therapies Trigger Uveitis                              | Meghan Berkenstock    |
| 08:10 - 08:20                      | A Shot in the Eye: Uveitis After Intravitreal Injections                         | Justus G. Garweg      |
| 08:20 - 08:30                      | Inherited Retinal Diseases mimicking Uveitis                                     | Sofia Androudi        |
| 08:30 - 08:40                      | When Treatment Bites Back: Can Biologics Induce Uveitis?                         | Christoph Deuter      |
| 08:40 - 08:50                      | Para-neoplastic Autoimmune Retinopathies: When the Body Turns on the Eye         | Carlos Pavesio        |
| 08:50 - 09:00                      | Non-paraneoplastic Autoimmune Retinopathies                                      | Bahram Bodaghi        |
| 09:00 - 09:10                      | AZOOOR: update on current developments   | Anita Agarwal         |
| 09:10 - 09:20                      | Acute Outer Retinopathy & Acute Annular outer Retinopathy                        | Elisabetta Miserocchi |
| 09.20 - 09.30                      | Melanoma Associated Retinopathy: What's new?                                     | Jose S. Pulido        |
| <b>09:30 – 9:45</b>                | <b>Panel Discussion<br/>Not the Usual Stuff</b>                                  |                       |
| <b>Moderator</b>                   | Steven Yeh   |                       |
| <b>Panelists</b>                   | Emilio Dodds, Kalpana Babu Murthy, Carsten Heinz, Thuy Doan, Toshikatsu Kaburaki |                       |
| <b>9:45 - 10:15</b>                | <b>Refreshment Break + Posters</b>   |                       |

| <b>Session 6<br/>10:15 – 11:30</b> | <b>IUSG Plenary Session 2<br/>Multimodal Imaging in Uveitis (MUV): What we learnt</b> |                       |
|------------------------------------|---|-----------------------|
| <b>Moderators</b>                  | Janet L Davis, Douglas A Jabs   |                       |
| 10:15 - 10:25                      | Beyond Borders, Beyond Beliefs: The concept of MUV                                    | Vishali Gupta         |
| 10:25 - 10:35                      | Systematic Review for White Dots: What literature taught us                           | Janet L Davis         |
| 10:35 – 10:45                      | Deconstructing White Dot Syndromes  | Alessandro Invernizzi |
| 10:45 – 10:55                      | Endpoints in Imaging for Posterior Uveitis  | Aniruddha Agarwal     |
| 10:55 - 11:05                      | MUV for Infectious Posterior Uveitis: Moving Forward                                  | Mudit Tyagi           |
| 11:05 - 11:15                      | MUV for Panuveitis  | Timothy Janetos       |
| <b>11:15 – 11:30</b>               | <b>Panel Discussion: Imaging with a purpose</b>                                       |                       |
| <b>Moderator</b>                   | Sapna Gangaputra  |                       |
| <b>Panelists</b>                   | Reema Bansal, Peizeng Yang, Jessica Shantha, Edmund Tsui, Ines Leal                   |                       |

| <b>Session 7<br/>11:30 - 12:30</b> | <b>IUSG Award Session</b>  |   |
|------------------------------------|--|---|
| <b>Moderators</b>                  | Ilknur Tugal Tutkun, Marc de Smet, Massimo Accorinti, Sapna Gangaputra   |   |
| 11:30 – 11:35                      | Lifetime Distinguished service IUSG Award (Felicitation)   | K. Matti Saari                          |
| 11:35 – 11:40                      | Award for Distinguished service to IUSG (Felicitation)   | Philip I. Murray                        |
| 11:40 - 11:45                      | IUSG Trailblazer Award for MUV (Felicitation)  | Janet L. Davis                          |
| 11:45 - 12:05                      | Introduction of C. Stephen Foster Awardee<br><br>C. Stephen Foster Inaugural Award lecture:<br>Immunosuppression for Uveitides: an evidence-based approach | Quan Dong Nguyen<br><br>Douglas A. Jabs |
| 12:05 - 12:25                      | Introduction of K.M. Saari IUSG Gold Medal Awardee   | Marc D. de Smet                         |

|               |  |               |
|---------------|--|---------------|
|               | K.M. Saari IUSG Gold Medal Lecture:<br>Global Diseases, Global Voices, Global Solutions  | Vishali Gupta |
| 12:25 – 12:30 | Release of Book by IUSG:<br>“CASE STUDIES IN UVEITIS: REAL CASES & PRACTICAL INSIGHTS”<br>Editors: Alejandra de-la-Torre, Germán Mejía-Salgado, John H. Kempen, Reema Bansal, Meghan Berkenstock & Vishali Gupta |               |

|               |                    |
|---------------|--------------------|
| 12:30 – 13:15 | <b>symposium</b>   |
| 13:15 - 14:00 | <b>Lunch break</b> |

|                                   |   |                              |
|-----------------------------------|---|------------------------------|
| <b>Session 8</b><br>14:00 - 15:20 | <b>Symposium D</b><br><b>Paediatric Uveitis Unplugged: Genes, Journeys &amp; Juvenile Challenges</b>  |                              |
| <b>Moderators</b>                 | Sibel Kadayifcilar, Ilknur Tugal-Tutkun   |                              |
| 14:00 - 14:10                     | Juvenile Idiopathic Arthritis–Associated Uveitis: Current Landscape and Future Frontiers              | Arnd Heiligenhaus            |
| 14:10 - 14:20                     | TINU Syndrome and other rare Paediatric entities  | Deshka Doycheva              |
| 14:20 - 14:30                     | Blau Syndrome, Childhood Sarcoidosis Uncovered: Pearls for Paediatric Practice                        | Justine R. Smith             |
| 14:30 - 14:40                     | Paediatric Behçet’s Disease: My Way Through the Maze  | Ilknur Tugal-Tutkun          |
| 14:40 - 14:50                     | Paediatric Glaucoma with Inflammation   | Massimo Accorinti            |
| 14:50 - 15:00                     | Managing Cataract in children: A challenge  | Parthoprattim Dutta Majumder |
| <b>15:00 - 15:20</b>              | <b>Panel Discussion</b><br><b>The Most Challenging Part of Uveitis: Paediatric Uveitis</b>            |                              |
| <b>Moderator</b>                  | Annabelle A. Okada  |                              |
| <b>Panelists</b>                  | James T. Rosenbaum, Mamta Agarwal, Stephan Thurau, François Willermain, Timothy Janetos, Joke de Boer |                              |

|               |                                    |
|---------------|------------------------------------|
| 15:20 – 15:50 | <b>Refreshment Break + Posters</b> |
|---------------|------------------------------------|

| <b>Session 9<br/>15:50 - 17:35</b> | <b>Debates 1: Hot Topics</b>  |                           |
|------------------------------------|---|---------------------------|
| <b>Moderators</b>                  | Ester Carreño, Francesco Pichi  |                           |
| <b>Session / Time</b>              | <b>Topic</b>  | <b>Speaker</b>            |
| 15:50 – 15:55                      | Debate 1. ACTH for Uveitic Macular Edema: Is there a role: Yes                            | Quan Dong Nguyen          |
| 15:55 - 16:00                      | Debate 1. ACTH for Uveitic Macular Edema: Is there a role: No                             | Anita Agarwal             |
| 16:00 - 16:05                      | <b>Voting &amp; Conclusion</b>  |                           |
| 16:05 - 16:10                      | Debate 2. AI in decision making; can I trust? Yes   | Marion R. Munk            |
| 16:10 - 16:15                      | Debate 2. AI in decision making; can I trust? No  | Edmund Tsui               |
| 16:15 - 16:20                      | <b>Voting &amp; Conclusion</b>  |                           |
| 16:20 - 16:25                      | Debate 3. Treating to Target in Uveitis: Innovation or Passing Trend? Innovation          | Justine R. Smith          |
| 16:25 - 16:30                      | Debate 3. Treating to Target in Uveitis: Innovation or Passing Trend? Passing Trend       | Jennifer E. Thorne        |
| 16:30 - 16:35                      | <b>Voting &amp; Conclusion</b>  |                           |
| 16:35 - 16:40                      | Debate 4. Systemic therapy with Biologics: First Line or Last Resort for JIA? First Line  | Douglas A. Jabs           |
| 16:40 - 16:45                      | Debate 4. Systemic therapy with Biologics: First Line or Last Resort for JIA? Last Resort | John H. Kempen            |
| 16:45 – 16:50                      | <b>Voting &amp; Conclusion</b>  |                           |
| 16:50 – 16:55                      | Debate 5. Treating Toxoplasmosis: Local Versus Systemic: Local only                       | Daniel Vasconcelos-Santos |
| 16:55 - 17:00                      | Debate 5. Treating Toxoplasmosis: Local Versus Systemic: Systemic therapy                 | Ariel Schlaen             |
| 17:00 - 17:05                      | <b>Voting &amp; Conclusion</b>  |                           |

|               |  |                              |
|---------------|--|------------------------------|
| 17:05 - 17:10 | Debate 6. Intraocular Lymphoma with no CNS involvement: Systemic treatment must be given: Yes        | Luca Cimino                  |
| 17:10 - 17:15 | Debate 6. Intraocular Lymphoma with no CNS involvement: Systemic treatment must be given: Not always | Hiroshi Takase               |
| 17:15 - 17:20 | <b>Voting &amp; Conclusion</b>   |                              |
| 17:20 - 17:25 | PCR versus NGS: Is NGS ready for prime time? Yes   | Thuy Doan                    |
| 17:25 - 17:30 | PCR versus NGS: Is NGS ready for prime time? No  | Jolanda D.F. de Groot-Mijnes |
| 17:30 - 17:35 | <b>Voting &amp; Conclusion</b>   |                              |

**Gala Dinner**

**Venue:** Bebenhausen Monastery and Palace, Address: Im Schloss, 72074 Tübingen-Bebenhausen

**Departure from Tübingen city center: 7:00 pm**

## SCIENTIFIC PROGRAMME

Saturday, 11th July 2026 (Day-3)

| Session / Time                     | Topic  | Speaker                   |
|------------------------------------|--|---------------------------|
| <b>Session 10</b><br>08:00 - 09:00 | <b>Case Conference: The puzzles we face: Stories of complexity and clarity</b><br><b>(3 min case + 3 min Discussion)</b>       |                           |
| <b>Moderators</b>                  | Aniruddha Agarwal, Quan Dong Nguyen  |                           |
| <b>Panelists</b>                   | Carlos Pavesio, Anita Agarwal, Bahram Bodaghi, Nicholas Jones, F. Nilüfer Yalçındağ  |                           |
| 08:00 – 08:06                      | Unusual Presentation of Ocular Tuberculosis with Subretinal Abscess and optic disc edema                                       | Alok Sen                  |
| 08:07 – 08:13                      | Occult bilateral posterior scleritis as an initial ocular manifestation of Crohn’s disease                                     | Saba Ishrat               |
| 08:14 – 08:20                      | When Herpes Prefers the Macula: A Shared Angular Juxtafoveal OCT Phenotype in Two Atypical Presentations of Herpetic Retinitis | Laura Distefano Dominguez |
| 08:21 – 08:27                      | Mystery case   | Atul Arora                |
| 08:28 – 08:34                      | Pigmented Paravenous Chorioretinal Atrophy Developing After Acute Bilateral Inflammatory Exudative Retinal Detachment          | Theejuti Suanoi           |
| 08:35 – 08:41                      | VKH misdiagnosed as angle closure  | Navya Cherukuri           |
| 08:42 - 08.48                      | Beyond Behçet’s Disease: Granulomatous Uveitis as a Clinical Clue for Suspected A20 Haploinsufficiency                         | Nilufer Zorlutuna Kaymak  |
| 08:49 – 08:55                      | Intravitreal management of ocular lymphoma should use adjusted drug concentrations not fixed dosages                           | Maria Carmela Saturno     |

|                    |  |
|--------------------|--|
| <b>9:00 - 9:15</b> | <b>Mini symposium</b><br>Ultra wide field imaging in uveitis<br>Quan Dong Nguyen, MD |
|--------------------|--|

|                    |                                    |
|--------------------|------------------------------------|
| <b>9:15 – 9:45</b> | <b>Refreshment break + Posters</b> |
|--------------------|------------------------------------|

|  |   |                     |
|--|---|---------------------|
| <b>Session 11</b><br><b>9:45 – 11:00</b> | <b>Rapid Fire Session (3 min presentation; 2 min Discussion)</b>  |                     |
| <b>Moderators</b>                        | Philip I. Murray, Eric L. Crowell   |                     |
| 9:45 - 9:50                              | Genetic and functional characterization of glycoprotein B in cytomegalovirus-associated ocular diseases   | Nobuyo Yawata       |
| 9:51 - 9:56                              | Do Etiologies Diverge in Neuroretinitis? OCT Outcomes Over One Year and Baseline CBC  | Berru Yargı Özkoçak |
| 9:57 – 10:02                             | Performance of Artificial Intelligence–Derived Choroidal Thickness and Vascularity Index in Vogt–Koyanagi–Harada Disease: a longitudinal analysis | Joana Pargana       |
| 10:02 – 10:07                            | Predictive modelling differentiating tubercular from non-tubercular retinal vasculitis  | Anushka Agarwalla   |
| 10:08 – 10:13                            | Epidemiology of Uveitis in Taiwan: A 19-Year Multicenter Study  | Po-Yi Wu            |
| 10:14 – 10:19                            | Automated Machine Learning–Based Predictive Model for Diagnostic Vitrectomy in Uveitis  | Shristi             |
| 10:20 – 10:25                            | Generating a murine model for CMV Anterior Uveitis  | Yunhua Loo          |
| 10:26 – 10:31                            | Detection of ganciclovir-resistant CMV mutation in Cytomegalovirus related ocular disease   | Kayo Suzuki         |
| 10:32 – 10:37                            | Targeting Ocular Toxoplasmosis: Focus on retinal microglial IL-1 alpha  | Caio Figueiredo     |
| 10:38 – 10:43                            | Sterile Uveitis After Intravitreal Aflibercept 8-mg: A Real-World Study in nAMD and DME   | Leonard Coulibaly   |
| 10:44 – 10:49                            | The Evolving Landscape of Novel Oncology Therapeutics: A Multidisciplinary UK Position Statement on Managing Ocular Inflammatory Toxicities       | Nima Ghadiri        |
| 10:50 -10:55                             | Preserflo MicroShunt implantation in refractory uveitic glaucoma  | Charlotte Evers     |

| <b>Session 12</b><br><b>11:00 – 12:00</b> | <b>Debates 2: Hot Topics</b>   |                      |
|---|--|----------------------|
| <b>Moderators</b>                         | Cristina Muccioli, Aniruddha Agarwal   |                      |
| 11:00 - 11:05                             | Debate 1. Do all Retinal Vasculitis Patients need Systemic Work up? Yes  | Jessica Shantha      |
| 11:05 - 11:10                             | Debate 1. Do all Retinal Vasculitis Patients need Systemic Work up? No   | James T. Rosenbaum   |
| 11:10 - 11:15                             | <b>Voting and Conclusions</b>  |                      |
| 11:15 - 11:20                             | Debate 2. Should all Uveitis patients be screened for Monogenic Autoinflammatory Syndromes? Yes                | Claudia Fabiani      |
| 11:20 - 11:25                             | Debate 2. Should all Uveitis patients be screened for Monogenic Autoinflammatory Syndromes? No                 | Soumyava Basu        |
| 11:25 – 11:30                             | <b>Voting and Conclusions</b>  |                      |
| 11:30 – 11:35                             | Debate 3. Are JAK inhibitors the future of Non-infectious Uveitis management? Yes                              | De-Kuang Hwang       |
| 11:35 – 11:40                             | Debate 3. Are JAK inhibitors the future of Non-infectious Uveitis management? No                               | Jarmila Heissigerova |
| 11:40 – 11:45                             | <b>Voting and Conclusions</b>  |                      |
| 11:45 – 11:50                             | Debate 4. Should We Classify Uveitis Primarily by Etiology or by Immunopathogenic Pathways? Etiology           | Stephan Thureau      |
| 11:50 – 11:55                             | Debate 4. Should We Classify Uveitis Primarily by Etiology or by Immunopathogenic Pathways? Immunopathogenesis | Gerhild Wildner      |
| 11:55 - 12:00                             | <b>Voting and Conclusions</b>  |                      |

|               |           |
|---------------|-----------|
| 12:00 – 12:45 | symposium |
| 12:45 - 13:30 | Lunch     |

|   |   |                         |
|---|---|-------------------------|
| <b>Session 13</b><br>13:30 - 15:15                      | <b>Symposium E</b><br><b>Diagnostic Dilemmas and Therapeutic Tensions in Infectious Uveitis</b> |                         |
| <b>Moderators</b>                                       | Bianka Sobolewska, Sudharshan Sridharan   |                         |
| 13:30 - 13:40   | Unusual and Atypical Ocular infections  | Derrick P Smit          |
| 13:40 - 13:50   | Viral Anterior Uveitis: Evolving Insights and Management Updates                                | Soon Phaik Chee         |
| 13:50 - 14:00   | When Cure Turns Culprit: Paradoxical Reactions in Infectious Uveitis                            | Manisha Agarwal         |
| 14:00 - 14:10   | CME in Infectious Uveitis: A Persistent Clinical Puzzle   | Marc D. de Smet         |
| 14:10 - 14:20   | RNA Virus: has incidence increased following COVID?   | Moncef Khairallah       |
| 14:20 - 14:30   | Post Fever Retinitis: What is new?  | Padmamalini Mahendradas |
| 14:30 - 14:40   | Defining Success: Endpoints for Anti-Infective Therapy for Uveitis                              | André Curi              |
| 14:40 - 14:50   | Improved PCR techniques for detection of infective organisms                                    | Koh-Hei Sonoda          |
| <b>14:50 - 15:15</b>                                    | <b>Panel Discussion</b><br><b>Managing the challenges of Infectious Uveitis</b>                 |                         |
| <b>Moderator</b>  | Lyndell L. Lim  |                         |
| <b>Panelists</b>  | Ariel Schlaen, Peter McCluskey, John H. Kempen, Robert P. Finger, Justus G. Garweg              |                         |
| <b>Valedictory and Vote of Thanks: Christoph Deuter</b> |   |                         |

**Group Excursion**

**Venue:** Hohenzollern Castle, Address: 72379 Burg Hohenzollern

**Departure from Tübingen city center:** 3:30 pm.
