

International Uveitis Symposium Tübingen

A circular fluorescein angiography image showing a complex network of retinal blood vessels. The vessels are highlighted in white and light blue against a dark background, with a central bright spot where the vessels converge.

Optos Symposium

“Importance of Wide-Field Fluorescein Angiography
in the Diagnosis and Management of Uveitis”

Speaker

Dr Quan Dong Nguyen, Professor of Ophthalmology at the
Byers Eye Institute, Stanford University School of Medicine

Saturday 11th July from 9:15 - 9:30am
